WATER RESCUE BOOT

Introducing the WRS Water Rescue Boot, engineered to empower water rescue and flood rescue teams. Designed for optimal fit within dry suits and wetsuits. Its high ankle construction and neoprene materials provide a secure seal against debris and sand. The high-friction sole ensures stability on treacherous wet surfaces, while the bonded fibreglass safety toe cap safeguards against impact. The innovative BOA® lacing system allows for quick and secure tightening, eliminating entanglement risks. Enhanced with a Kevlar fibre protection midsole and oil resistance, the WRS Water Rescue Boot delivers exceptional protection and grip in demanding flood and water rescue operations.
