Technical description:

- sling intended for securing people against fall
- univerzal
- light-weight
- system of quick and easy unpacking
- RL buckle for length adjusting

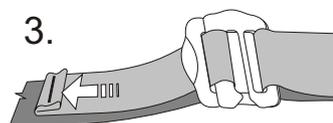

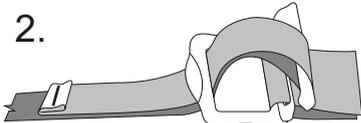

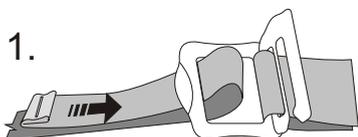

Rescue sling to secure evacuated persons against accidental fall during rescue action (e.g. ski lift evacuation).

Rock & Lock buckle

Only small effort of your fingers is needed to lock and open.

1. Make the loop and put it through the buckle frame.
2. Hook the loop on cross bar.
3. Tighten.

It is easy as that.
