

TECHNICAL RESCUE HELMET

Introducing our multi-purpose rescue helmet, engineered for versatility and safety in various rescue scenarios including interventions at heights, water rescue, marine safety and technical rescue operations. Featuring a highly adjustable cradle, large adjusters, and clips for glove-friendly use, along with internal goggles and a low temperature classification of -20 degrees Celsius, this helmet ensures comfort and reliability in harsh conditions.

Its ventilated shell enhances airflow, while side mounting options accommodate accessories like a torch. There is a band clamp for an external goggle and a Velcro patch for SAR LED. Equipped with silver reflective markings and replaceable padding, this helmet also offers an optional full face visor for comprehensive protection.
